First, take this piece of paper, and tear it in half where the line crosses it. Hand the bottom half to your buddy.

Then, you (and your buddy's) task during this section is to read a bug report against a real project. You'll each explain it to each other after you're done understanding it. If you are not sure what is going on, feel free to ask your buddy for help.

Remember that this is a real bug in a real project!

Nickname: "No December"

Short-link: bit.ly/cant-print
Real URL (in case the above doesn't work): https://code.google.com/p/android/issues/detail?id=39692

Questions you should try to answer:

- What is the problem the person is experiencing?
- On what date did the wrong behavior get introduced?
- What caused the wrong behavior?
- How did the behavior get fixed, and who fixed it?

You (and your buddy's) task during this section is to read a bug report against a real project. You'll each explain it to each other after you're done understanding it. If you are not sure what is going on, feel free to ask your buddy for help.

Remember that this is a real bug in a real project!

Nickname: "Can't print... sometimes"

Short-link: bit.ly/no-december
Real URL (if the above doesn't work): https://bugs.launchpad.net/ubuntu/+source/cupsys/+bug/255161

Questions you should try to answer:

- What is the problem the person is experiencing?
- Are there particular days of the week that people can reliably print?
- What caused the wrong behavior?
- How could the issue have been fixed more quickly?
